WORK EXPERIENCE

Barclays Bank PLC

Pune, Maharashtra, India

Software Engineer (BA4)

07/2023 - Present

- Architected and developed an account onboarding feature using **SAGA orchestration and the transactional outbox pattern**, enabling seamless integration across Treatments, Payments, and Transaction Processing domains.
- Co-created a **real-time payments authorization module for the Amazon Barclaycard**, achieving 70 TPS with a 60 ms P95 response time, leveraging Java, Spring Boot, RESTful architecture, and Amazon Web Services (AWS) for scalability and reliability.
- Built a proof-of-concept AI agent to resolve Prisma using Barclays' internal LLM to explore **Agentic AI-assisted problem resolution**.
- Implemented a centralized payments limits management system by designing RESTful service contracts, AWS-hosted Spring Boot microservices, and PostgreSQL data models managed via Liquibase for DDL/DML deployments, enabling secure multi-channel payment processing at a scale of 20 million GBP.
- Automated deployment and version management by introducing a **manifest-based deployment** framework, reducing manual tracking effort and minimizing production release errors.
- Engineered an optimized **FCA-compliant Persistent Debt** logic on the next-gen credit card platform by restricting evaluations to eligible accounts, resulting in 85% memory and processing savings over the legacy system utilizing AWS Lambda functions and ECS.
- Executed the migration of microservice components to Java 17 and Spring Boot 3, enhancing system performance.
- Created alarms, metrics, dashboards, and a logging framework using AWS CloudWatch for effective production monitoring.
- Achieved 100% test coverage for new code using JUnit, Mockito & adopted BDD techniques to create clear feature scenarios, enhancing collaboration with developers, analysts, and QA teams.

Cyboard School (EdTech Startup)

Delhi, India (Remote)

Web Developer Intern

06/2021 - 09/2021

- Designed a responsive web UI with a performance score of 90+ on Google Lighthouse using HTML, CSS, Bootstrap, JS, React.js library and packages like AOS, sweet-alert, and Glightbox.
- Optimized homepage performance score on Desktop by 200% using speed optimization strategies like lazy loading, pre-fetching/pre-loading, and caching that helped improve page ranking on search engines.

EDUCATION

Thadomal Shahani Engineering College

Mumbai, India

Bachelor of Engineering in Computer Engineering (CGPA: 9.49/10)

2019 - 2023

PROJECTS

Etherdocs | Final year graduation project

[Documentation](#) | [Demo video](#)

Academic Document Verification Decentralised Application

- Developed a blockchain-based decentralized application (DApp) for secure academic document verification, leveraging React.js, Ethereum, smart contracts in Solidity, and IPFS for document storage, achieving 100% immutability and tamper-proof records.

SKILLS

Programming Languages, frameworks & libraries : Java, Spring Boot, JUnit, Mockito, Cucumber, ReactJS, SQL, Python, PostgreSQL
AWS tools and services : AWS SDK, Lambda, Kinesis Data Streams (alternative to Apache Kafka), DynamoDB (NoSQL Database), Simple Queue Service (SQS), IAM Roles and Policies, S3, ECS, CloudFormation Templates (alternative to Terraform), OpsCenter
Key modules : Java Design Patterns, Microservices, Data Structures, Rest APIs, Object-Oriented Design, Event Driven Architecture
Other : Git, Maven, SonarQube, Veracode, Jenkins, Bitbucket, Gitlab, Confluence, Infrastructure as code

ACCOMPLISHMENTS

- [AWS Certified Cloud Practitioner](#), Amazon Web Services (AWS) (Jan 2025)
- Recognized with Partnerships spot award in Sept 2025 by Pete Seddon(Barclays Partnerships CIO).
- Ranked 3/1700+ on Geeks on GeeksForGeeks platform ([view standings](#)).
- Ranked 1st in Project Expo Prkalp-2023 organised by Fr CRCE E-cell.
- Stood 3rd in Project Expo organised by TSEC E-cell-2022.
